

Black Forest Park to Expand!

With the addition of approximately 200 acres, Black Forest Regional Park will now include a new visitor's center located in Cathedral Pines. The 1,000 square foot space will serve as an interpretive and information center to both the citizens of northern El Paso County and visitors from outside our region.

With the new alignment of Milam Road, the existing trail network will be improved and will utilize a grade separated crossing under Milam Road. This will allow the safest route for all of our trail users.

Construction is underway and you can look for the improvements in the park to be completed in 2006.
